

# INSTALLATION INSTRUCTIONS **TRACK CONNECTOR**

**For larger openings, double sliding doors can be installed using 2 track kits and a track connector.**

## **1. Install the 2 tracks and doors**

Center the two tracks within the opening. Install each following the instructions that came with them.

## **2. Install track connector**

Line up the connector with the holes on each track, making sure the lip of the connector is on the bottom of the track. Place a screw in each hole through the front and connect a nut on the backside. Tighten with allen wrench.
